TASK 1

You are currently working on the topic "How has the pandemic changed our lives?" in your English class. Your teacher has asked each of you to write a message to the group answering that question but focusing on how the pandemic has affected gender equality. You've seen this information in the newspaper and decide to use it for your task.

Girls and young women aged between 14 and 24 are taking responsibility for the majority of household chores during the pandemic, leaving them less time to focus on their education, according to a new survey.

Sixty-six percent of girls and women aged between 14 and 24 said they are spending more time cooking for their families as a result of the pandemic, compared with 31% of boys and men in the same age group.

Women and girls are also spending more time cleaning (69%, compared with 58% of boys and men), shopping (52%, compared with 49%), and looking after siblings (28%, compared with 16%), according to a survey of 1,000 men and women aged 14-30 produced by a market research agency for the children's charity Theirworld.

"There are reports that women's equality could be pushed back by up to 10 years by the pandemic and this is a stark reminder that the fight for gender equality is ongoing," said Sarah Brown, the chair of Theirworld.

"The findings from this study show that when girls are locked out of school they can easily become trapped in traditional household roles which can put their education in jeopardy."
