TASK ONE

Please only use this document for your notes. Write your final version on the answer sheet. Tasks written on this paper will not be corrected.

TASK ONE (5 points)

Read the instructions carefully and write an email of 60-70 words

You work at an English-language secondary school and are responsible for the library. Students are fined if they return the books they borrow after the deadline. You think it is ineffective and discourages students from borrowing books.

After reading the following post on a website, you decide to write an email of 60-70 words to the Head of School summarising the main points in your own words about why the fines system should be cancelled.

Task that do not follow the instructions will not be marked.

LIBRARIES ARE GOING FINE-FREE

A number of library systems have seen patronage rise as overdue books are returned and outstanding fines are forgiven. In Chicago, for instance, the number of returned overdue books jumped from 900 a month to 1,650, and 11,000 of the folks returning them renewed or replaced their library cards. Now, more books in Chicago are being checked out overall.

...

If e-books are the future, we may soon see a day when library fines cease to exist altogether, since you don't return an e-book to the library — it simply vanishes from your device when the borrowing period expires.

Cleveland Public Library Executive Director Felton Thomas Jr. explained the movement to eliminate fines ... : "We want to connect people to knowledge and ideas, not stand in the way. This important step will help us do our everyday work of fostering learning experiences — sparking curiosity, making connections, and building skills."

FOOD WASTAGE

FOOD WASTE IN THE U.S. IS...

EXCESSIVE

40%

OF ALL FOOD PRODUCED
IN THE U.S. IS WASTED

EXPENSIVE

\$161

 BILLION

Uneaten food at retailers,
restaurants, and homes
costs \$161 billion annually

ENVIRONMENTALLY HARMFUL

Food makes up 20%
of landfill weight—the
single largest municipal
waste source

The methane
released by food
is a greenhouse
gas 21 times more
powerful than
carbon dioxide

AN OPPORTUNITY

Diverting 15% of the food
that currently goes to
waste would be enough
to cut the number of food
insecure Americans in half

Food waste can
be composted into
sustainable soil
additives or be used
to generate electricity

Encouraging institutions
to purchase so-called
"ugly" produce would help
farmers find new markets
for healthy products that
currently go to waste
