	PUNTUACIÓN
TAREA 1: MEDIACIÓN ESCRITA	/5
TAREA 2: MEDIACIÓN ORAL	/5
	/10

APELLIDOS: _____ NOMBRE: _____

TASK ONE (5 marks)

Read the instructions carefully and write a message of 60-70 words.

Your 80-year-old British neighbour Peter is not very good with technology. He is trying to set up his new mobile phone but cannot understand what biometrics means and has asked you for help. Send him a WhatsApp message explaining to him the information below in your own words.

What's Biometrics?

Biometrics is a way to authenticate a user's digital access to systems, devices, or data using a single or combination of biometric identifiers. A biometric identifier is any physical or behavioural characteristic that can uniquely identify an individual. According to research, fingerprints are one of the most common types of biometric authentication among enterprises.

Smartphones supporting biometric authentication come with a hardware security module where all information pertaining to the user's biometric data like fingerprint scan, facial image, voice print is safely stored. During the authentication process, biometric information is collected by the fingerprint reader, camera, or microphone and sent to the module. This module compares the information received from the hardware to original data stored by the user and if matched successfully, permits access. This ensures that the original biometric data of the user is never shared with any software or system outside the module.

APELLIDOS: _____ NOMBRE: _____

Tasks that do not follow the instructions will not be marked.

TASK ONE

Write your final version here.

[illegible]

MEDIACIÓN LINGÜÍSTICA

TAREA 1: MEDIACIÓN ESCRITA

MODELO DE ACTUACIÓN

Hi!

By using biometrics your telephone can confirm you are who you say you are. It is a way to recognize unique and personal physical or behavioural patterns, like fingerprints. There's a part in your device that saves that information, and compares it to any new data received to check that none of your data goes anywhere else.

Hope this helped!

(61 words)

SET 1**TASK 2: SPOKEN MEDIATION**

Your friend Alice, from London, wants to work remotely from Spain for some months. She has asked you for information about what type of bank account to open in Spain. Send her a voice message **explaining** the information below in your own words.

You can make notes which can only be used as a guideline. The test will be recorded.

Preparation time: 5 minutes

Presentation time: 2-3 minutes

Cuenta Mundo for non-residents

Conditions:

The Cuenta Mundo for non-residents is a non-interest bearing current account with a maintenance fee of €16 per month. To open this account, all you need is to be over 18 years of age and to be non-resident in Spain.

- Debit Card with no issue or maintenance charges.
- Free debit cash withdrawals by card using ATMs on the bank's network in Spain and from more than 30,000 ATMs.
- With the bank's App, you can check your spending and the limits available and even block your card in the event of loss or theft. Also, manage your income and payments any time, anywhere.
- Free transfers via Internet, mobile banking or at ATMs for any amount sent or received in euros and sent in foreign currency.
