

TAREA 1

A YOUNG CELLIST

You are a young classical music lover, but some of your friends think that classical music is just something only middle-aged and older people play and listen to; so, they don't even want to give it a try. Last week you just happened to get hold of this radio programme about Sheku Kanneh-Mason, a young cellist. You've decided to write an e-mail (**100-120 words**) to your friends to tell them about it. Listen to the recording, take notes and summarise the main facts mentioned in it. You will hear the recording twice.

## TAREA 2

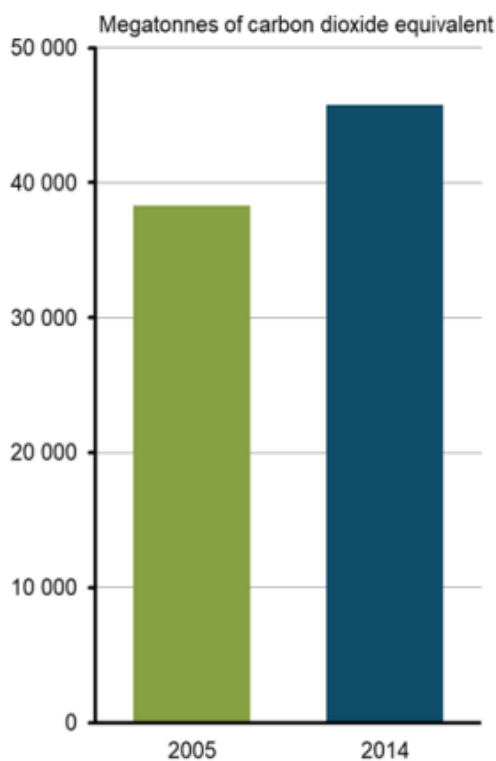

### GREENHOUSE GAS EMISSIONS

You work as journalist for a local newspaper and have received the following charts on world greenhouse gas emissions between 2005 and 2014. Your boss has asked you to write a short explanation (**100-120 words**) of the main trends regarding the issue. Your presentation would be included in a more general article. He/she wants you to make sure you comment on the following aspects:

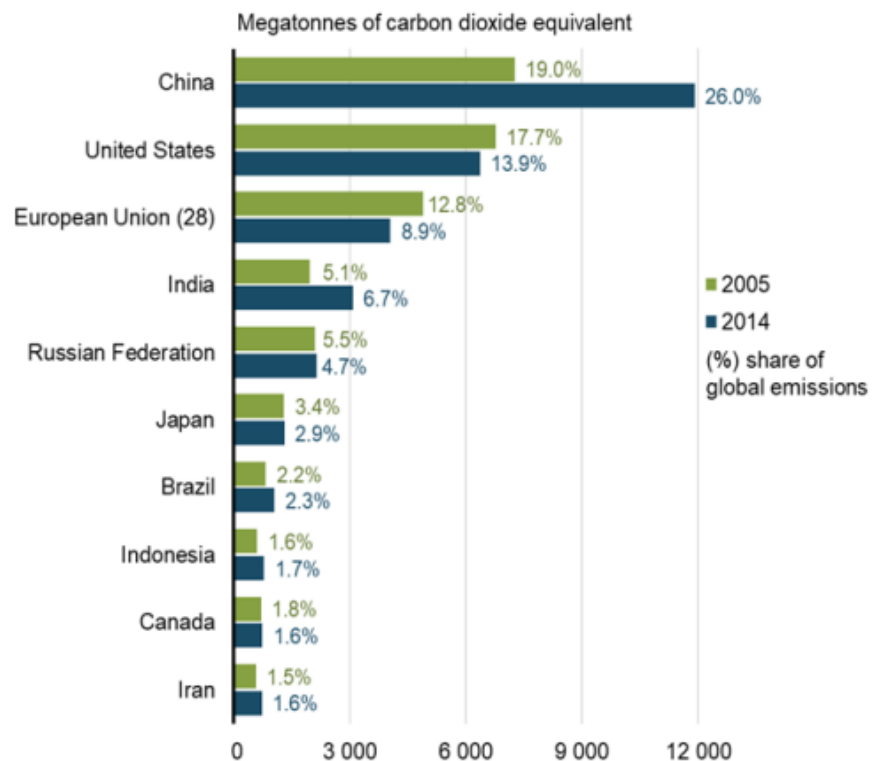

- What is the general trend?
- Specific trends, relevant examples.
- Possible explanation for those cases and/or conclusion.
