Part 3. SENTENCE COMPLETION. The Mona Lisa's Twin Painting Discovered

The radio presenter explains that there is a **(0) REPLICA** of the Mona Lisa, which was painted at the same time as the Leonardo masterpiece.

Martin Bailey explains the layer of black paint has recently been **(1) PAINSTAKINGLY** removed by the conservators and the rest of the painting has been cleaned.

The experts believe that the changes made to the copy **(2) MIRRORED** those that were made to the original and they have concluded that the two paintings were probably created side-by-side on **(3) EASELS** situated very near to each other.

The presenter hypothesizes on the possibility that while Leonardo was **(4) TWEAKING** the background of his masterpiece, the other artist was making the same changes to the copy.

Bailey suggests that what added a **(5) TWIST** to the painting was the fact that the model was actually in the studio.

The presenter states that she feels that there is more mystery in the original and this might be due to the fact that the image is **(6) ENGRAINED** on our mind.
