TASK 1

**Write about 130-150 words following the instructions.
The recommended time for this task is 30 minutes.**

MARK

After long doing the same dull and dreary work in your company's department and finding yourself a bit on the burnt-out side, the idea of getting relocated started spinning in your head. You are positive that your being internally transferred to a more challenging department would prove utterly beneficial for the company's interests. It would also help you feel motivated and in high spirits.

Your line manager has already given you the go-ahead to request the transfer but ultimately, it is the senior manager who will have the last say.

Write your internal transfer **request** addressed to the senior manager, stating the reasons why you believe that it is in the company's best interests that you are relocated to the department you believe you could be a good asset for.

<p>Use the space below to note down and organise your ideas. These notes will not be marked.</p>

TASK 2

Choose one of the following options (A or B) and write about 200-220 words following the corresponding instructions.

The recommended time for this task is 45 minutes.

MARK

OPTION A

Online education has become an everyday reality for millions of students around the world given the COVID-19 crisis. At first, teachers had to face it with a total lack of resources and a great deal of imagination on their part. Nevertheless, educational tools have eventually become more available and the question that remains now is whether teachers and students are ready for such a change in the education format.

Write an **article** arguing whether online education is a suitable education format for all education stages and institutions.

OPTION B

Accessibility and inclusion of people with disabilities—which include vision and hearing impairment, motor disability, and mental health conditions, among others—remain two of the main global ongoing issues. Many able-bodied people tend to think that everything that is necessary for the disabled has already been done, but only when you find yourself in that position do you realise that this is not true. Despite some advances, research shows that individuals with disabilities are still at a higher risk of social exclusion than those without them.

As a member of *Disability in Action*, which campaigns for the rights of people with disabilities, write a **proposal** addressed to the Town Council outlining the main difficulties that individuals with disabilities face in terms of accessibility and social inclusion, and suggesting actions that can be implemented in order to improve their everyday life conditions.
