TASK B. CO-PRODUCTION. A COMMENT.

You read the following post on social media:

Hey! The other day I was thinking, being a delivery driver is a hell of a tough job. For one thing, they're always stressed out, sweating their butts off for a few bucks. On top of that, I don't know if people will still need so many of them when the pandemic wears off. Plus, I've heard they'll be replaced by robots or drones before they know it. So, it doesn't look like the most secure job on earth. Besides, why is it mainly dudes that do this job anyway? Let me know what y'all think about all of this.
