PART 1 (5 points)

You are going to hear a talk by Bob Snow, Professor of Malaria Epidemiology and Tropical Public Health, on the topic of Malaria control in Africa. You have been asked to write a summary of what you hear for a friend who couldn't attend. Make notes on the paper provided while listening to the talk. After the recording has been played, use your notes to write a **titled summary**. You will hear the recording only once. Your summary should be **200 words** approximately.

EEOOOIIDE LA RIOJA

PART 2 (5 points)

You work for the Department of Tropical Medicine at the University of London and are conducting a piece of research on how medical funding contributes to the decrease in the number of deaths in Africa. Your research director has asked you to write **a report** on your findings. Look at the graphs on the separate exam sheet and use the data to write your report suggesting some recommendations on how to tackle the problem of disease in developing countries. Your report should be **300 words** approximately.
